PRO WET PLUG

WATER STOPPING CEMENT

DESCRIPTION:

PRO WET PLUG is a quick setting, hydraulic, cementitious, water stopping grout which provides a tight bonding, dense barrier to permanently seal out active water. When mixed with potable water, this formula sets in 3 to 5 minutes at 70° F (21° C).

USES AND APPLICATIONS:

- For use in foundation and retaining walls, dams, tunnels, sewers, wastewater treatment plants, mines, wells elevator pits, cisterns and tanks.
- To plug any leaks in any concrete or masonry surface.
- To prevent seepage along cracks or seams at the floor and wall intersection and seal holes left by tie wires.
- To seal all leaks around piping and conduit passing through concrete and masonry walls.

ADVANTAGES:

1. Fast setting
2. Stops flowing water
3. Very low shrinkage
4. Easy to handle
5. Sets up under water
6. Excellent freeze/thaw resistance
7. Nonmetallic
8. High early strength
9. Approved as a water stopping cement in federally inspected meat and poultry plants.

SPECIAL NOTES:

- Apply to a clean, sound, properly prepared substrate.
- Application and curing times are depended upon ambient conditions. Cold temperatures retard set time and hot temperatures accelerate set time.
- Minimum ambient surface temperature should be above 50° F (10° C) at the time of application, however, warm water should be used to mix the materials at lower temperatures. Call CGM technical services for more information on cold weather applications.
- Inactive leaks should be thoroughly dampened prior to and for approximately 15 minutes following application.

SURFACE PREPARATION:

Undercut the substrate and open the crack or hole to a minimum depth and width of 1" (2.5cm). Wire brush and then flush away all loose material. Remove all oil, grease, dirt and other contaminants by scrubbing with an industrial detergent, flushing thoroughly with clean water to expose clean sound concrete. The substrate surface must be thoroughly wet before applying PRO WET PLUG.

MIXING:

PRO WET PLUG is supplied as a pre-measured unit. Using a small amount of water, mix the material in a small pail until a putty type consistency is obtained. Do not mix more material than can be placed in 2 minutes. Do not temper the material.

POT LIFE:

PRO WET PLUG has a pot life of 2 minutes at 70° F (21° C). Cold water 40° F (4° C) will retard the set time and hot water 90° F (32° C) will accelerate the set time.

CURING:

The curing time of PRO WET PLUG is approximately 3 to 5 minutes at 70° F (21° C).

YIELD:

PRO WET PLUG will yield approximately 0.4 cu.ft. (0.01 cu.m) per 50 lb. pail and bag.

PRIMING:

The use of a primer before the application of PRO WET PLUG is not necessary.

APPLICATION:

To stop flowing water PRO WET PLUG must be placed immediately after mixing. Using gloved hands, form the material into a cone shape and hold until a slight rise in temperature occurs. Then firmly press and hold the PRO WET PLUG into the repair area until final set occurs.

The PRO WET PLUG may now be shaved to obtain a flush finish with the surface. In other areas of repair, PRO WET PLUG may be trowled into open cracks and joints.

Prior to applying the PRO WET PLUG, ensure that the substrate is wet or damp to avoid premature and/or uneven curing.

COVERAGE:

One pound of PRO WET PLUG will fill 17 cu./in., or a crack 3/4" X 3/4" X 30"

PACKGING:

PRO WET PLUG is packaged in a 50 lb. Pail and bag.

SIZE	STOCK NO.	UNITS PER CARTON	WT. PER CARTON
50 LB PAIL	50WE	1	53 LBS.
50 LB BAG	50WED	1	50 LBS.

STORAGE CONDITIONS:

Store PRO WET PLUG at or above 45° F (7° C) in a dry area. Avoid excessive heat or humidity. Shelf life is one year in the original, unopened container.

COLOR:

PRO WET PLUG is available in gray only.

SHELF LIFE:

When stored in original, un-opened container, one year. Rotate your stock.

TECHNICAL DATA:

Temperature limitations:

- Low temperatures retards set time
- High temperatures accelerate set time

Compressive Strength (ASTM C 109):

- 15 minutes 750 psi
- 1 day 3,700 psi
- 7 day 4,400 psi
- 28 day 5,500 psi

PRECAUTIONS:

1. Dispose of waste materials in accordance with Federal, State and local regulations.
2. The use of a dust mask, safety goggles and rubber gloves are recommended.
3. **CAUTION:** Contains Portland Cement which is highly caustic.
4. Contains Free Silica. Do not breath the dust as inhalation may cause delayed lung injury (silicosis) and is a carcinogen.
5. In case of eye contact, flush with water. Wash skin with soap and water if contact occurs. Consult a Physician
6. Use only with adequate ventilation

KEEP OUT OF REACH OF CHILDREN
